

Upgrade your cladding and your color choices.

The exterior of Hurd aluminum clad wood windows and patio doors is fully encased in maintenance-free, heavy-duty, extruded aluminum. Ours is at least twice as thick as our competitors' roll-form cladding.

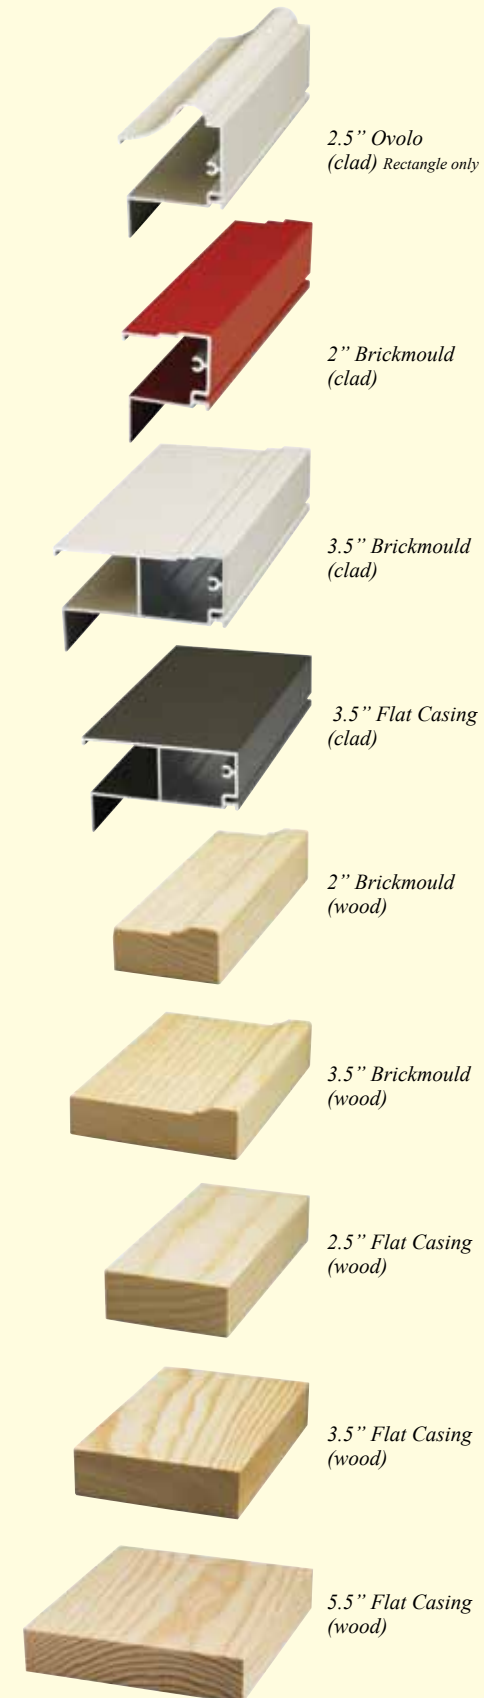

Nobody gives you more cladding choices than Hurd. Our 15 standard cladding colors were selected to enhance almost any home design. We also offer five extra-durable anodized aluminum finishes³ with no costly setup charges. Plus, we'll custom match any color you can imagine.

We use zero-VOC, AAMA 2604 powder paints that are heat-cured for a tougher finish. Our AAMA 2605 liquid paint is a beautiful upgrade recommended for coastal applications.

Shown in dark bronze and light bronze anodized cladding.

Exterior trim profiles. (Sizes are nominal.)

Standard colors.
